This listing of claims will replace all prior versions, and listings, of claims in the application (note that amendments are highlighted in bold):

Listing of Claims:

- 1. (original) A method for treating a human patient afflicted with cancer, comprising administering therapeutically effective amounts of temozolomide and irinotecan to such a patient for a time period sufficient to effect at least a partial tumor response.
- 2. (original) The method of claim 1, wherein the irinotecan is in the form of a hydrochloride salt.
- 3. (original) The method of claim 1, wherein the temozolomide and irinotecan are administered over repeated 21 day cycles, where said 21 day cycles are divided into three 1 week periods.
- 4. (original) The method of claim 3, wherein the total amount of irinotecan administered over the 21 day period ranges from 3 to 400 mg/m² of the patient's body surface.
- 5. (original) The method of claim 3, wherein the amount of temozolomide administered over the 21 day period ranges from 50-200 mg/m²/day of the patient's surface and wherein said temozolomide is administered for 5-14 days over the 21 day period.
- 6. (original) The method of claim 3, wherein the amount of temozolomide administered over the 21 day period ranges from 50-200 mg/m²/day of the patient's surface and wherein said temozolomide is administered for 5-14 days over the 21 day period and the innotecan is in the form of a hydrochloride salt.
- 7. (original) The method of claim 3, wherein the irinotecan is administered for 5 consecutive days at a daily dose of 10 to 40 mg/m²/day during the first week and for 5 consecutive days at a daily dose of 10 to 40 mg/m²/day

during the second week, followed by the third week in which irinotecan is not administered.

- 8. (original) The method of claim 7, wherein the temozolomide is administered for 5 consecutive days at a daily dose of 100 to 200 mg/m²/day during the first week, followed by the second and third week in which temozolomide is not administered.
- 9. (original) The method of claim 7, wherein the temozolomide is administered for 5 to 7 consecutive days at a daily dose of 100 to 200 mg/m²/day during the first and third weeks of the 21 day cycle.
- 10. (original) The method of claim 7, wherein the temozolomide is administered for 5 to 7 consecutive days at a daily dose of 100 to 200 mg/m²/day during the first and second weeks of the 21 day cycle.
- 11. (original) The method of claim 9, wherein the irinotecan is in the form of a hydrochloride salt.
- 12. (original) The method of claim 10, wherein the irinotecan is in the form of a hydrochloride salt.
- 13. (original) The method of claim 3, wherein the irinotecan is administered on a single day of the 21 day cycle in an amount of from 250 to 650 mg/m².
- 14. (original) The method of claim 3, wherein the irinotecan is administered once a week during the 21 day cycle at a dose of from 100 to 125 mg/m².
- 15. (original) The method of claim 3 wherein the temozolomide and irinotecan are both administered on the first day of the 21 day treatment cycle.

Page 5

- 16. (original) The method of claim 15, wherein the irinotecan is in the form of a hydrochloride salt.
- 17. (original) The method of claim 1, wherein the temozolomide is administered prior to the administration of the irinotecan.
- 18. (original) The method of claim 3, wherein the temozolomide and irinotecan are administered in three 21 day cycles, each cycle having a dosing period wherein the temozolomide is administered for the first five days of the 21 day cycle at a daily dose of 50 to 200 mg/m²/day, the irinotecan is administered with the temozolomide for the first 5 days of the 21 day cycle and for an additional 5 day period during the second week of the 21 day cycle at a daily dose of 10 to 40 mg/m²/day, followed by the third week in which temozolomide and irinotecan is not administered.
- 19. (original) The method of claim 17, wherein the temozolomide is administered orally and the irinotecan is administered intravenously.
- 20. (original) The method of claim 1, wherein the ternozolomide and irinotecan are administered over repeated 28 day cycles.
- 21. (original) The method of claim 20, wherein the total amount of irinotecan administered over the 28 day period ranges from 3 to 400 mg/m² of the patient's body surface.
- 22. (original) The method of claim 20, wherein the amount of temozolomide administered over the 28 day period ranges from 50-200 mg/m²/day of the patient's surface and wherein said temozolomide is administered for 5-14 days over the 28 day period.
- 23. (original) The method of claim 20, wherein the amount of temozolomide administered over the 28 day period ranges from 50-200 mg/m²/day

of the patient's surface and wherein said temozolomide is administered for 5-14 days over the 28 day period and the irinotecan is in the form of a hydrochloride salt.

- 24. (original) The method of claim 20, wherein temozolomide and irinotecan are administered over a 28 day cycle, wherein the temozolomide is administered on days 1-14 of said cycle at a daily dose of 75 to 150 mg/m²/day and wherein the irinotecan is administered on day 8 of said cycle at a daily dose of 100 to 350 mg/m²/day.
- 25. (currently amended) The method of claim 24, wherein the temozolomide is administered orally and the irinotecan is administered intravenously --.--
- 26. (original) A medical kit for treating a cancer patient is provided, comprising:
 - (a) a supply of temozolomide;
 - (b) a supply of irinotecan; and
 - (c) printed instructions for administering temozolomide and irinotecan to a cancer patient.
